

AI POWERED NUTRITION ANALYZER FOR FITNESS ENTHUSIASTS

Proposed Solution

The proposed system is fully computerized, which removes all the drawbacks of existing system. Proposed system is an online application that can be accessed throughout the organization and outside as well with proper login provided. The users will create the account, after creating account user will login the account using his/ her username and password. When the user entered into his respective page he has to update his medicine details. This is contrast to the sequential search being done in the existing system have been taken care of in the system. The proposed system of the medicine reminder system will have one duty and that would be to remind the user that he is due for taking the medicine. We are trying to make sure that the user never forgets to take the medicines.

S. No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	The remarkable problem is that patients forget to take the proper medicines in proper proportion and in proper time.
2.	Idea / Solution description	The voice command can be set for multiple medicines and timings including date, time. A notification will be sent to them through email or message inside the system preferably chosen by the patients.
3.	Novelty / Uniqueness	The user gets the voice commands through this system.
4.	Social Impact / Customer Satisfaction	The main objective is to remind the patients of their dosage timings through voice command system so that patients can stay fit and healthy.
5.	Business Model (Revenue Model)	-
6.	Scalability of the Solution	This system is providing more memory for the users to maintain data.
