PERSONAL ASSISTANCE FOR SENIORS WHO ARE SELF-RELIANT

1. CUSTOMER SEGMENTS	5. AVAILABLE SOLUTIONS	8. CHANNELS OF BEHAVIOUR
Patients has to upload the medicines details to the system	Voice commands Sent to appropriate persons	The proposed system of the medicine reminder system will have one duty and that would be to remind the user that he is due for taking the medicine.
2. JOBS TO BE DONE / PROBLEM	**6 CUSTOMER CONSTRAINTS**	**9. PROBLEM ROOT CAUSE**
Reminders cannot be set automatically. There is a need for manual work in setting the reminder.	The manual system is more error prone.	The system doesn't provide facility to track all the information of patient medicine details.
3. TRIGGERS	**7 BEHAVIOUR**	**10. YOUR SOLUTION**
This system is providing more memory for the users to maintain data	System also provides facility to update the medicines information.	The Proposed system requires less time for completion of any work. This is contrast to the sequential search being done in the existing system have been taken care of in the system. The proposed system of the medicine reminder system will have one duty and that would be to remind the user that he is due for taking the medicine.
4. EMOTIONS: BEFORE / AFTER A lot of time is consumed in manually setting the reminders System provides facility to users can get the alert notification quickly
